

# ***Chemistry in Australia* copyright transfer agreement**

Authors submitting feature articles for publication to *Chemistry in Australia* are required to transfer copyright of their article to the publisher, the Royal Australian Chemical Institute.

**Article title** \_\_\_\_\_

\_\_\_\_\_

**Name and address of principal author** \_\_\_\_\_

\_\_\_\_\_

**Names of all other contributing authors** \_\_\_\_\_

I, the principal author, declare the following with regard to the submission of the above-named article:

- The article has not been published and is not being considered for publication elsewhere.
- The article represents original work and its publication will not infringe the copyright or any other intellectual property right (including a right in the nature of a trade secret) of any entity or individual.
- I am the copyright holder or have permission to reproduce any images or line art supplied.
- All authors have agreed to this submission (if more than one author).
- I am authorised to sign this document either in my own right or as an agent for my employer.

I also understand and agree on behalf of all above-named authors to the following terms and conditions of transfer:

- The author(s) assigns to the Royal Australian Chemical Institute the entire copyright in the text of the article.
- The Royal Australian Chemical Institute grants the author(s) a non-exclusive licence to reproduce the text of the article for their own internal purposes, research and public presentations.
- The author(s) retains copyright in their own artwork and research data.
- The author(s) grants the Royal Australian Chemical Institute a non-exclusive licence to reproduce in whole or in part the artwork and research data in the article, and to permit third parties to reproduce in whole or in part any such materials contained in the article.
- The Royal Australian Chemical Institute may reproduce the article in all forms and media including online and electronic publication.
- After publication in *Chemistry in Australia*, the text of the article as published in *Chemistry in Australia* may be uploaded by the author(s) to their own website(s) or to an online institutional repository, provided that the Royal Australian Chemical Institute is acknowledged as the copyright holder.
- When exercising any of the rights granted in this agreement, each party must appropriately acknowledge the contribution made by the other party to the published article.
- Copyright in the article reverts to the author(s) if the article is not published within one year of the date of this agreement.
