

JOINT CHEMICAL ENGINEERING COMMITTEE

Offshore Oil and Gas Subsea Installation Techniques: From Seabed to Surface

Speaker: Simon Griffiths, Project Manager

Date: Wednesday 10th April 2013

Venue: Engineers Australia - Level 11, 108 King William St, Adelaide

Program: Drinks and networking from 5:45pm with the presentation starting at 6:00pm

Simon Griffiths has worked extensively throughout the North Sea, Mediterranean and West Africa and will be presenting different installation techniques and intervention methods used currently in the offshore subsea industry.

The presentation will provide a broad overview of general installation techniques including saturation diving and remote operated vehicle (ROV) operations.

The session will conclude with a simulation of a world first complete ultra-deep water riser installation, completed in West Africa.
